 Vinobanagar, Shimoga

 linkedin.com/in/pavansj

Profile Summary

Full-Stack Developer with 4+ years of experience building scalable, production-grade web applications and cloud-native solutions. Expertise in Next.js, React.js, Node.js, GraphQL, REST APIs, and MongoDB, with hands-on AWS experience including EKS, Amplify, CloudFront, CodePipeline, and Translate. Skilled in microservices architecture, multi-language automation, SEO engineering, and CI/CD pipeline design. Delivers pixel-perfect Figma implementations and develops high-performance user experiences in Agile environments.

Technical Skills

|                                                                                                                                                           |                                                                                                                                                                      |

| 07/2025 – Present<br>Bangalore            | <b>Full stack Developer</b><br><i>Autovert Technologies Pvt Ltd</i> <ul style="list-style-type: none"><li>Developed scalable full-stack applications using <b>Next.js, Node.js, MongoDB, GraphQL, and REST APIs</b> within a microservices-based architecture and role-based access control.</li><li>Designed and implemented production-ready frontend modules following <b>pixel-perfect Figma designs</b>, improving user experience and platform consistency.</li><li>Implemented CI/CD workflows using <b>AWS CodePipeline</b>, enabling streamlined deployments and improved release efficiency.</li><li>Worked extensively with AWS services including <b>Amplify, EKS, CloudFront, Translate, CloudWatch, and CodePipeline</b> to support cloud-native application development.</li><li>Contributed to containerized deployments on <b>Amazon EKS</b>, helping achieve high availability, automated scaling, and reduced application startup latency.</li></ul>  |
| 08/2022 – 07/2025<br>Bangalore, Karnataka | <b>Application Developer</b><br><i>Riversilica Technologies Pvt. Ltd</i> <ul style="list-style-type: none"><li>Developed a system monitoring application using React.js, Redux, and WebSockets, improving node configuration efficiency by 50%.</li><li>Implemented CI/CD pipelines with Jenkins and GitLab, reducing deployment cycles by 30%.</li><li>Engineered Android applications using Java and SQLite Room Database, integrating WebSockets for real-time API connectivity.</li><li>Collaborated on a hybrid news app (React Native + Android), leveraging AWS Lambda for RTMP-to-HLS streaming, enhancing user engagement by 40%.</li><li>Built a secure video player with ExoPlayer, CZ DRM, and EZ DRM, optimizing playback performance within intranet setups.</li><li>Designed a responsive IP video monitoring dashboard with React.js and Node.js, reducing API latency by 25% and improving file upload reliability by 35% using TUS protocol.</li></ul> |

Projects

---

Ecozaar 

(E-Commerce Platform)

- Led development of the complete **User Management System**, including authentication, authorization, profile management, and backend APIs.
- Developed scalable backend services using **GraphQL and REST APIs** for customer-facing and administrative workflows.
- Engineered a multilingual **Blog & News Management System**, automating content translation across regional languages using **AWS Translate**.
- Implemented intelligent region-based language switching, improving content accessibility and user engagement across multiple geographies.
- Collaborated on a microservices architecture to improve maintainability, deployment independence, and scalability.
- Implemented SEO enhancements including **dynamic sitemap generation**, metadata optimization, search-engine indexing improvements, and Figma Perfection Design.
- Developed and integrated a customer **Referral System** on the frontend to support growth and user acquisition initiatives.

Pulse Ecosystem

(ERP & Asset Management Platform)

Inventra – Inventory & Asset Management

- Developed modules for EV inventory lifecycle management supporting B2B leasing operations and vehicle tracking.
- Built dashboards and workflows for inventory visibility, asset monitoring, and operational management.
- Developed secure and scalable frontend interfaces using Next.js integrated with GraphQL-based services.
- Contributed to a vehicle inspection and valuation platform used for EV assessment and reporting as well as vehicle health metrics.

Elektra Assured – Asset Redeployment Platform

- Digitized procurement, refurbishment, onboarding, and resale workflows for pre-owned EV assets.
- Replaced spreadsheet-based processes with structured workflow automation and management dashboards.
- Integrated inventory and asset-management capabilities to provide complete operational visibility across the asset lifecycle and controlled access through role-based access.

Node Management System

React, Redux, Jenkins

- Developed a real-time Node Management System using React.js, Redux, and WebSockets, integrated with Jenkins CI/CD pipelines, reducing downtime by 30% and boosting monitoring efficiency by 50%.

News App

Java, AWS Lambda

- Developed a robust Android application for news content creators, facilitating the upload of both live and pre-recorded streams; leveraged AWS Lambda to achieve real-time API connectivity, improving load times by 40%.

OTT Application

Java, SQLite Room Database, Web-socket's, ExoPlayer, CZ and EZ DRM

- Architected an Android TV OTT app from scratch using Java, WebSockets, and SQLite Room Database, optimizing real-time playback and enhancing API security.
- Created an IPTV platform with Java, ExoPlayer, and CZ/EZ DRM, optimizing secure playback and API performance for seamless intranet delivery.
